Set, Agglutination, Field

SOURCE: Tokyo, Japan.

IMPORTANCE: Not previously reported.

DESCRIPTION: This set consists of a wooden case, 13 1/2" x 11" x 4", with a metal fastener and leather handles. The contents fit compactly in individual racks. The test tubes are of two different sizes and the smaller ones are placed inside the larger ones when packed.

The set contains the following items:

1. Syringe, hypodermic, 2cc	ea	20
2. Test tubes, large	ea	20
3. Test tubes, small	ea	20
4. Pipette (180 Min)	ea	30
5. Needles, hypodermic, 23 gauge, 1 inch cannula, box of 12	box	3
6. Rubber bulbs (for pipettes)	ea	30

COMMENT: The contents of this set are of the usual type and quality. This set is of interest because it is very compact and contains all the things necessary for agglutination.
